

Henrique Oliveira

Santa Clara, CA | holiveira@scu.edu | +1 (847) 624-6104 | [Website](#) | [LinkedIn](#) | [GitHub](#)

EDUCATION

Santa Clara University

Expected Graduation: June 2027

BS in Computer Science; minor in Management Information Systems

Grade: Senior

Organizations: Santa Clara Investment Fund (tech sector), Latinx Business Student Association (external events & built the [website](#))

Coursework: Adv. Programming (C++, Python), Data Science (SQL, Pytorch, Excel), Data Structures, Operating Systems (Linux)

PROFESSIONAL EXPERIENCE

(Incoming) GITHUB | San Francisco, CA

June 2026 – September 2026

Product Management Intern – Copilot Agents

- Joining the GitHub Advanced Security product team to work on Copilot Autofix, CodeQL, and secret scanning, focusing on helping enterprise developers automate AI-assisted vulnerability detection and remediation
- Scoping projects around eval infrastructure and criteria based on what developers need in CI/CD token security coverage tools

PARKD | Santa Clara, CA

May 2025 – Present

Product Manager & Co-Founder

- Co-founded Parkd, a parking management platform using LPR-based permit validation to deliver real-time enforcement alerts
- Organized partnerships with Santa Clara University and Bellarmine College Prep, from cold outreach to pitching to admin, managing liability risk, organizing IT integration, to campus-wide adoption <1 year
- Leading a team of 3 student engineers to build a full-stack development product via weekly check-ins, stand-up meetings, code reviews, maximizing engagement while minimizing burnout, and helping manage school schedules
- Mapped out multi-tenant architecture spanning RTSP ingestion > LPR inference > permit validation > real-time dashboard alerts
- Designed dashboard frontend with React.js, backend using Node.js + Prisma + PostgreSQL on AWS, with Python LPR bridge
- Orchestrated CI/CD via dev/prod branches, GitHub Actions for auto-testing, enabling safe rollouts and A/B testing of features
- Containerized local dev stack (Docker + Redis) mirroring production with role-based access control across 6 permission tiers
- Led 15+ software releases while driving rapid feedback iteration, delivering stable multi-campus deployments to 10k+ users

PERMISO SECURITY | Palo Alto, CA

June 2024 – September 2024

Product Management Intern

- Collaborated with cross-functional engineering, UI/UX design, and GTM teams to align customer needs to business objectives
- Wrote 100+ user stories/Jira tickets, PRDs, accelerating product lifecycle, reducing backlog, and enabling faster feature delivery
- Designed and validated a per-user pricing model for SaaS and cloud infrastructure integrations by running SQL queries on AWS, resulting in improved sales pipeline conversion, influencing \$2M in potential ARR
- Developed 'trust score' framework to quantify identity cybersecurity risk posture by combining identity factors with machine learning-based dynamic behavioral analytics, improving how F500 customers identify high-risk identities

BATTERY VENTURES | San Francisco, CA

May 2023 – August 2023

Analyst Extern

- Selected for a highly competitive externship at a leading VC firm investing out of a \$3.8 billion fund in early-stage SaaS
- Sourced and evaluated 1,000+ SaaS startups, identifying high-potential candidates for investment, pitching 5 weekly
- Drove business analysis for 3 prospective investments by leading in founder calls, data visualization of key performance indicators, mapping competitive landscape, market analysis, and ultimately presenting to VPs and general partners

PROJECTS

THREADED NEXUS | LLM-Powered Relationship CRM

March 2026 – Present

- Developed a personal CRM that aggregates LinkedIn, email, WhatsApp, and calendar to surface contextual insights and automate message drafting and calendar management, across 100+ relationships, saving est. 10+ hours weekly
- Designed a fully local inference pipeline using Gemma4 13B, fine-tuned via QLoRA on my Nvidia GPU with RAG-based contextual memory, enabling secure, real-time contact intelligence with no cloud dependency

SKILLS & INTERESTS

Human Languages: English & Portuguese (Bi-lingual, Native speaker), Spanish (Fluent, 3rd language)

Technical Skills: JavaScript (Node, React), Python, SQL, Bash/Linux, AWS (DynamoDB, S3), REST APIs, Jira, Figma, GitHub

Product Management: A/B Testing, Communication, User Feedback & Research, Prototyping, UI/UX, Technical Docs & PRDs

Interests: Playing Guitar, Music (all genres – esp. Jazz, Alt, Latin), Writing ([Substack](#)), Fitness, Photography, Anything Outdoors
