

Henrique Oliveira

Santa Clara, CA | holiveira@scu.edu | +1 (847) 624-6104 | henriqueoliveira.dev | [LinkedIn](#) | [GitHub](#)

EDUCATION

Santa Clara University

Expected Graduation: June 2027

BS in Computer Science; minor in Management Information Systems

Organizations: Santa Clara Investment Fund ([Tech Research Lead](#)), Latinx Business Student Association (made [the website](#))

Coursework: Adv. Programming (C/C++), Intro Data Science (Python), Data Structures, Embedded Systems, Operating Systems

PROFESSIONAL EXPERIENCE

GITHUB | San Francisco, CA

June 2026 – September 2026

Product Manager I - Intern

- Drove model evaluation strategy for LLM-based code vulnerability scanning products, benchmarking precision/recall against an 8,256-repo / 34k-CVE ground-truth corpus + existing SAST baselines to guide accurate evaluation
- Wrote 100+ KQL queries against internal data warehouse to surface backup data + build visualizations to support eval thesis
- Led 10+ AppSec customer interviews to pressure-test eval narratives, driving async customer + team alignment on epics
- Conducted competitive intel across 5 AI code-security entrants (incl. OpenAI Codex Security, CodeRabbit, Claude Security), benchmarking detection approach and bundling strategy to sharpen GitHub Copilot's differentiation narrative
- Synthesized 2+ years of ambiguous internal discussions around evaluations in <2 weeks by building an AI-assisted workflow
- Authored [blog post](#) outlining evaluation methodology and LLM-based security narrative for 100k+ enterprise customers
- Prototyped MCP data layer connecting Copilot to Microsoft Fabric via REST API, enabling cross-functional teams to answer product/metrics questions in <1 min; adoption pending responsible AI checks (mainly hallucination risk)

PARKD | Santa Clara, CA

May 2025 – Present

Engineering Manager & Co-Founder

- Co-founded [Parkd](#), a parking management platform using LPR-based permit validation to deliver real-time enforcement alerts
- Organized partnerships with Santa Clara University and Bellarmine College Prep, from cold outreach, pitching to admin, managing liability risk, IT stack integration, to campus-wide adoption <1 year
- Leading a team of 3 student engineers to build the full-stack product via coordinating projects, weekly team stand-up meetings, bug triage sessions, and individual check-ins, while minimizing team burnout and helping manage school schedules
- Mapped out multi-tenant architecture spanning RTSP ingestion > LPR inference > permit validation > 10k+ daily real-time alerts
- Designed dashboard frontend UI using React.js, backend via Node.js + Prisma + PostgreSQL on AWS, with Python LPR bridge
- Orchestrated CI/CD via dev/prod branches, GitHub Actions for auto-testing, and containerized local dev stack (Docker + Redis) to mirror production with role-based access for 6 permission tiers, enabling safe rollouts and A/B testing of features
- Led 15+ software releases while driving rapid feedback iteration, delivering stable multi-campus deployments to 10k+ users

PERMISO (acquired by [Okta](#)) | Palo Alto, CA

June 2024 – September 2024

Product Management Intern

- Collaborated with cross-functional engineering, UI/UX design, and GTM teams to align customer needs to business objectives
- Wrote 100+ user stories/Jira tickets + PRDs, accelerating product lifecycle, reducing backlog, enabling faster feature delivery
- Designed and validated a per-user pricing model for SaaS and cloud infrastructure integrations by running SQL queries on AWS, resulting in improved sales pipeline conversion, influencing \$2M in potential ARR
- Spearheaded 'trust score' framework tool to quantify identity security risk posture by combining identity factors with machine learning based dynamic behavioral analytics, improving how F500 customers identify high-risk identities

PROJECTS

THREADED NEXUS | LLM-Powered Relationship CRM

March 2026 – Present

- Developed a [personal CRM](#) that aggregates LinkedIn, email, WhatsApp, and calendar to surface contextual insights and automate message drafting across 100+ relationships, saving est. 5+ hours weekly
- Designed a fully local inference pipeline using Gemma4 13B, fine-tuned via QLoRA on my Nvidia GPU with RAG based contextual memory, enabling secure, real-time contact intelligence with no cloud dependency

SKILLS & INTERESTS

Human Languages: English & Portuguese (Bilingual, Native speaker), Spanish (near-Fluent, 3rd language)

Technical Skills: System Design, Programming (JavaScript, C/C++, Python, SQL), Bug Triage, LLM Evaluation, Data Analysis

Product Management: A/B Tests, Communication, User Feedback & Research, Prototyping, UI/UX Design, Technical Docs / PRDs

Interests: Playing Guitar, Music (all genres; esp. Rock, Alt, Bossa), Writing ([Substack](#)), Chess, Photography, Anything Outdoors
